

Anti-Tox

Feed supplement for Mycotoxin Binding

Indications

The product *Anti-tox* is an innovative feed supplement that promotes the binding of mycotoxins and intestine-toxins effectively preventing their digestive absorption by eliminating the negative effects of mycotoxins on the health and efficiency of horses. The fungicide with optimized composition is based on a complicate and highly effective complex of activated high-strength natural silicates enriched with inorganic and organic acidifiers and the involvement of yeast strains to achieve effective absorption of wide rangeuptake, inhibition of development of various fungi due to its good antifungal and antibacterial activity. Is a non-digestible product so can absorb toxins, which can be removed from the body through dexterity. It can be used directly by the farmer in the daily ration as a feed supplement. Depending on the levels of mycotoxin contamination in the feed, the product may reduce or prevent the harmful effects of mycotoxins on health. Mycotoxins are potentially very harmful toxic chemicals produced by fungi that grow in or over plants (seeds, oilseeds, pulses, grasses). There are over 100 mycotoxins that have negative effects on the health of horses when they enter the organisms through feed.

Composition per 1000gr

SiO ₂	60.00%
Al ₂ O ₃	17.20%
Propionic acid	3.80%
Citric acid	2.00%
Formic acid	1.00%
Fe ₂ O ₃	5.30%
MgO	2.80%
K ₂ O	0.90%
CaO	1.00%
TiO ₂	0.60%
Na ₂ O	0.40%
Moisture	4.90%

Daily Dosage

Daily dosage per 100kg body weight:

Preventive use	2,5 gr
Slight symptoms or presence of mycotoxins in the feed	5 gr
Strong symptoms or presence of mycotoxins in the feed	10 gr
Rehabilitation	7,5gr

Package

500gr, 1kg -10kg
