

Electrolytes

Liquid Feed supplement for the replenishment of the major Electrolytes

Electrolytes

Composition per liter

Natrium chloride	10.000 mg
Magnesium sulphate	20.000 mg
Copper sulphate	10.000 mg
Manganese sulphate	20.000 mg
Zinc sulphate	15.000 mg
Iron sulphate	5.000 mg
Cobalt sulphate	3.000 mg
Potassium iodide	1.000 mg
Selenium	50 mg
Distillate water up to	1.000 ml

Daily Dosage

Activity	Small Horses (<450kg)	Large Horses (>450kg)
Maintenance	8ml	10ml
Foals	4ml	5ml
Pregnant mares	10ml	13ml
Breastfeeding mares	15ml	20ml
Stallions	10ml	13ml
Training	15ml	20ml
Race	20ml	30ml
Recovery (15 days)	20ml	25ml

Indications

Electrolytes are essential elements for maintaining hydration, muscle contraction of nerve conduction and blood pH balance. Under extreme temperature conditions or during intense exercise, many electrolytes are lost by exhalation and perspiration. Significant loss is also observed in case of diarrhea. Failure to make proper replenishment through nutrition or supplementation causes dehydration of the body, feeling intense weakness and cramps. It is recommended to administer them before and during the races to prevent dehydration and then to replenish the lost electrolytes.

Package

Bottle of 1 liter
