Indications

Horses as a species require high level care. **HORSE POWER 301** is a basic concentrated nutritional supplement that provides your horses with all the necessary macro and trace elements which are needed daily, as well as all vitamins while being enriched at high levels with the necessary amino acids for the synthesis of proteins. The thirty nutritional ingredients are the best way to help the well-bein and health of the horse, in a daily use. It is a low calorie supplement that is given for a balanced nutrition, as it is difficult for a horse to take it from its main feed. It is necessary for horses that fed mainly with grass and for horses that follow a low-level diet or follow a special nutrition with fewer calories to regulate their weight.
