Methionine	5.000 mg
Support up to	1.000 gr

Dosage

Medium Horses: 15gr /horse/day
Large Horses: 20gr /horse/day

Package

500gr, 1kg -10kg

Indications

Nutri Garlic is a concentrated nutritional supplement based on garlic extract. It combines the beneficial properties of the oregano -oil, trace minerals and essential amino acids in a product with a pleasant aroma and flavor. It promotes the health of the horse in an absolutely easy and natural way, ensuring good appetite and healthy digestion. Garlic and oregano have anti-bacterial, antiviral, anti-fungal, anti-parasitic and anti-inflammatory activity. Ensure a healthy digestive system by selectively acting against pathogenic microorganisms, by reducing the population of intestinal parasites, while protecting the beneficial flora. At the same time as the smell of sweat, can contribute to the reduction of disturbing insects (mosquitoes, ticks and worms) especially during the summer period. It can also be applied as a patch in the wounds acting as an antiseptic.
