Zinc Sulphate	3000 mg
Propylene Glycole	50.000 mg
Distillate water up to	1000 ml

Daily Dosage

Activity	Small Horses (<450kg)	Large Horses (>450kg)
Maintenance	10ml	15ml
Foals	5ml	10ml
Pregnant mares	15ml	20ml
Breastfeeding mares	20ml	25ml
Training	15ml	20ml
Race	25ml	30ml
Balance Ω6	15ml	20ml

Indications

The *Omega 3* feed supplement is a powerful effective source of omega-3 fatty acids for the nutrition of the horses. The daily use of omega 3 enhances general well-being, has positive effects on reproduction, bone growth, and alleviates numerous inflammatory conditions in horses. It also offers vitality and a bright, shiny coat, achieving a long, beautiful glowing mane and tail. With Ω3 use during the exercise-training, a lower heart rate is achieved, with correspondingly lower levels of insulin, cholesterol and glucose in the plasma serum. It helps reduce arterial pressure due to antihypertensive properties of omega-3 fatty acids and reduce exhausted respiratory problems (obstruction or inflammation of the airways) by improving the respiration of the suffered horses in a relatively short period of time. It contributes to the strengthening of the immune system (fight against trauma) and the prevention of autoimmune diseases.
